Skills & Tools

Front-End:

- HTML, CSS, JavaScript (JS), TypeScript
- React.js, Angular, React Native
- jQuery
- Bootstrap
- Responsive Design

Back-End & Databases:

- Node.js
- Express
- Python
- Django
- Django REST framework (DRF) (Learning)
- RESTful APIs
- Relational Databases (PostgreSQL & MySQL) & Non-Relational Databases (MongoDB)

Also proficient in:

- Git (Version Control) (GitHub)
- Test-Driven Development (TDD) (unit and integration tests) (Jest & Supertest) & Behavior-Driven Development (BDD)
- Object-Oriented Programming (OOP)
- Docker (familiarity)
- Heroku & Netlify (PaaS)
- Agile (Trello)
- Postman

Languages:

- English
- Persian

Summary

Passionate Full Stack Software Engineer with a background in Civil Engineering and a passion for continuous learning. Proficient in JavaScript and Python, with expertise in React, Node.js and Django. Always seeking understanding and exploring innovative solutions. Excellent collaboration and communication abilities, thriving in interdisciplinary collaborations to deliver high-quality results.

Experience

Full-Stack Engineer (Trainee) | CareerFoundry, Berlin, Germany, September 2022 - May 2023

- Intense project-based training program focused on JavaScript, Python, HTML, CSS and most prominent libraries, frameworks and tools.
- 500+ hours of hands-on training with guidance of industry leading tutor and mentor.
- Developed myFlix App: created a non-relational database (MongoDB) for movies, built REST APIs using Node.js and Express, tested them with Postman, and deployed the application on Heroku. Built the client-side interface using the React library and Angular framework.
- Recipe App: a full-stack web application using the Django development server. Deployed the application using Heroku, with a Postgres database at the backend, HTML, and CSS-based rendered pages at the frontend and Python-based Django as my web application framework.
- Meet App: a serverless, progressive web application (PWA) with React using a test-driven development (TDD) technique. The application uses the Google Calendar API to fetch upcoming events.

Executive engineer | Hafar Khak Combaden | Tehran, Iran, July 2016 - August 2020

- Control of accurate execution of works technically.
- Implement the project schedule and control it.
- Continuous communication with the site manager.

Education

Certificate in Full-Stack Web Development | CareerFoundry, Berlin, Germany, September 2022 - May 2023

M.E. Water Engineering | Magdeburg-Stendal University of Applied Sciences, Magdeburg, Germany, October 2020 - Present

B.S. Civil Engineering | Iran University of Science and Technology, Tehran, Iran, September 2011 - May 2016
